PART I · NAV WALK

THE MONTH, DRAWN AS A SINGLE LINE

Daily NAV marks for the month. Bronze markers record the best and worst observed days. The line is a record, not a prediction.

FIG. 1 · DAILY NAV WALK · APRIL 2026

Fig. 1. Daily NAV marks for the month. Bronze marker — best observed day. Faint red — worst observed day. The line is drawn from realised close-of-day values.

The book opened the month at 124440 and closed at 127450. The path was neither straight nor smooth — the strongest single day recorded +0.81%; the softest recorded -0.24%. The shape of the walk is a historical fact.

Mean daily return, annualised, stands at +28.8%. The reading should not be extrapolated.

BEST DAY

Largest single-day NAV gain this month.

WORST DAY

-0.24%
