자료는 과거 관찰 기록이며 투자자문이 아닙니다.

PART I · SEGMENT SHAPE

THE ROOMS THE PORTFOLIO FILLS

Each rectangle is a sector; the area of each rectangle is the share of book value.
Bronze shading reads return — darker shades, stronger returns observed this month. The treemap records, it does not prescribe.

FIG. 1 · SEGMENT TREEMAP · APRIL 2026

Fig. 1. Rectangle area reads book-share by segment. Fill opacity reads return — darker shades, stronger observed return. Bronze indicates positive return; faint red indicates negative.

The book sits mostly in Technology — nearly a third by weight — with Healthcare and Financials forming the second tier. The remaining seven segments split the lower band. The treemap reads what the book already holds; it is a month-end snapshot.

Concentration as measured by Herfindahl-Hirschman stands at 1,840. The figure is informational. It is a single observation of one statistical property of the current weights.

Method · GICS sector taxonomy.
Sample · Month-end holdings.
Next review · monthly close.

PART II · SEGMENT LADDER

EACH SEGMENT, READ ON ITS OWN LINE

Weights measured at month-end; drift read against the prior month's reference.
Return and volatility contributions are portfolio-level observations, not per-segment directives.

SEGMENT	WEIGHT	TARGET	DRIFT	RETURN CONTRIB	VOL CONTRIB	BETA	TRAJECTORY
Technology	32.5%	30.0%	+2.5	+3.84	42%	1.28	
Healthcare	14.2%	15.0%	-0.8	+0.50	10%	0.74	
Financials	12.8%	12.0%	+0.8	+0.61	12%	1.14	
Consumer Disc.	9.5%	10.0%	-0.5	-0.20	9%	1.22	
Consumer Staples	8.1%	8.0%	+0.1	+0.11	4%	0.58	
Industrials	7.2%	7.0%	+0.2	+0.37	7%	1.05	
Energy	5.6%	6.0%	-0.4	+0.46	6%	0.92	
REITs	4.8%	5.0%	-0.2	-0.04	3%	0.81	
Cash	3.1%	5.0%	-1.9	+0.01	0%	0.00	
International	2.2%	2.0%	+0.2	+0.07	7%	0.88	

Reference weights are user-configured; drift is the observed deviation from those references. Return and volatility contributions are written at the portfolio level and do not add linearly — covariance bends the accounting.

PART III · FOUR FRAMES

LENSES STACKED, EACH READING A DIFFERENT AXIS

Style box, region split, sector rotation, segment correlations. Each frame a different lens on the same month-end book.

STYLE BOX · 3 × 3

Large Growth · 18%

VALUE CORE GROWTH
Weight percent by size × style intersection.

REGION SPLIT

US · 72.5%

MSCI region classification, month-end weights.

RIGHT RAIL · NOTES

- 01 Segmentation is a lens, not a prescription.
- 02 Boundaries are conventions — GICS, MSCI, or style-box.
- 03 Weights are observed month-end, not intra-month.
- 04 Concentration is surfaced for transparency.
- 05 Informational only — not a portfolio instruction.

SECTOR ROTATION · 12M

Top 4 · TR

Top-4 sectors by observed 12M return.

CORRELATION · 5 × 5

Tech-Fin · 0.54

90D Pearson among top five segments.

Fig. 2. Four lenses on the same month-end book. Each frame is descriptive — a single observation on a single axis.

PART IV · EDITORIAL

WHAT THE DESK IS SITTING WITH

A sentence the desk is holding this month, and the short list of questions this segment report, by construction, does not answer.

*Segments are not strategies
— they are the chairs your
decisions happened to sit
in.*

— PIVOXQUANT RESEARCH DESK —

WHAT THIS SEGMENT REPORT DOES NOT ANSWER

- | | |
|--|---|
| 01 Whether any single weight is appropriate for a given household. | 04 Correlated news shocks outside the observation window. |
| 02 Tax consequences of rebalancing between segments. | 05 Personal liquidity needs by segment. |
| 03 Forward-looking style or sector rotation. | |
