PART I · COMPANY SNAPSHOT

EIGHT QUARTERS, OBSERVED

The revenue history, the year-over-year pace, and the range of analyst estimates for the quarter about to print. Factual record.

FIG. 1 · QUARTERLY REVENUE HISTORY
· LAST 8 QUARTERS

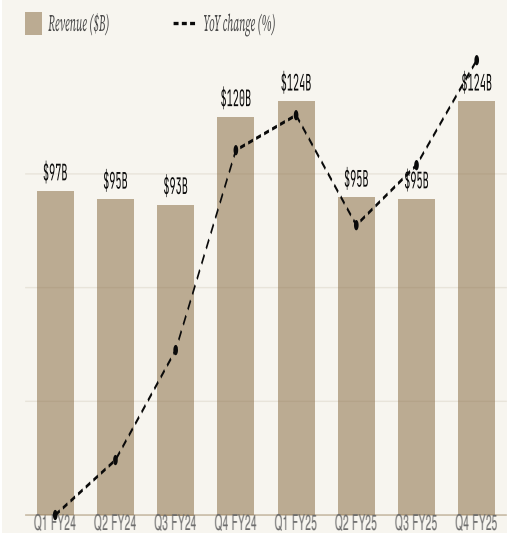

Fig. 1. Eight quarters of reported revenue (bronze bars, left axis) with YoY change overlay (ink dashed line, right axis). Observed record, sourced from the company's IR filings.

The company's revenue pace has held between roughly \$93B and \$125B across the observed eight-quarter window, with the familiar fourth-quarter seasonal peak appearing in both FY24 Q4 and FY25 Q4. YoY change has moved from mid-single-digit negative at the start of the window to low-single-digit positive by its end. These are observed print readings — not a shape claim about the quarter to come.

Across the four most recent reports, the surprise magnitude — reported EPS against the consensus observed on the day of each report — has averaged near the low-single-digit positive range, with one quarter sitting close to flat and none of the four landing below the consensus by more than a narrow margin. Three of four reports printed a positive surprise; one printed within a tenth of a cent of consensus. Record, not a pattern claim.

The analyst estimate range for the quarter now approaching is a factual band. The low end of the sampled observations sits at \$1.48; the high end at \$1.76; the median at \$1.62. The band is a reading of analyst observations — informational only, and not a target of any kind.

PART II · HISTORICAL SURPRISE LADDER

EIGHT PRINTS, EIGHT SURPRISES

A table of the last eight reports: consensus against actual, the surprise percentage, and the next-day price reaction. Observed record.
