PART I · THIS WEEK IN RETURNS

WHY THE SPREAD STAYED SMALL

A walking-chart reading of the last seven days, the book's measured lead, and the benchmark's unusually cooperative posture.

FIG. 1 · DAILY EQUITY WALK · SEVEN-DAY WINDOW

Fig. 1. A seven-day cumulative return walk. Solid line · portfolio. Dashed line · benchmark. The bronze callout names the single point where the book stepped cleanly away from the reference.

The book advanced 2.41% against the S&P 500's 1.12%, settling alpha at +1.29 percentage points. Read descriptively, this is the third consecutive week the spread has landed in the positive half of its ninety-day distribution.

The heavy lifting came from NVDA (+8.24%) and AVGO (+5.11%). The laggards — TSLA and NKE — declined in sympathy with cohort softness rather than name-specific catalysts on the calendar.

The observation worth naming is concentration: Information Technology sits at 32.5% of invested capital — above the thirty-percent guide for the fourth straight week.

S&P DRIFT · WOW

+1.12%

The benchmark's quiet, trend-like move during weeks without a macro catalyst.

REALISED Σ · GKYZ

0.88%

Garman-Klass-Yang-Zhang daily volatility, range-based and robust to overnight jumps.

CORR. TO SPY · 90D

0.42

Ninety-day Pearson correlation between portfolio daily returns and the SPY proxy.

CONCENTRATION

32.5%

Share held in the largest GICS sector. The book is allowed to run concentrated; the reading is surfaced for transparency.

PART II · POSITION LADDER

THE NAMES THAT MOVED THE BOOK

Each row normalised in-place — peaks are read against the row's own distribution, not across the book. End-of-week position marked in bronze.

TICKER	SEVEN-DAY TRAJECTORY	WOW	MAX	READING
NVDA		+8.24%	8.24%	Led the book.
AVGO		+5.11%	5.11%	Led the book.
TSM		+3.92%	3.92%	Led the book.
TSLA		-4.87%	4.87%	Largest drag.
NKE		-3.14%	3.14%	Largest drag.

FIG. 2 · PAIRWISE 90-DAY CORRELATION

	NVDA	AVGO	TSM	TSLA	NKE
NVDA	1.00	0.62	0.41	0.28	0.18
AVGO	0.62	1.00	0.58	0.22	0.14
TSM	0.41	0.58	1.00	0.33	0.20
TSLA	0.28	0.22	0.33	1.00	0.51
NKE	0.18	0.14	0.20	0.51	1.00

Fig. 2. Ninety-day return correlation among the top-five names. Bronze shades positive co-movement; oxblood, negative.

The structural read of the matrix is the 0.62 block between the top two semiconductor names, a reading that has held for three consecutive weeks. The platform cohort in the lower right corner clusters around 0.51, still below the 0.70 band the desk flags as a concentration concern. Off-diagonal bronze darkening remains within the ninety-day envelope observed through the quarter.

PART III · RISK DASHBOARD

READINGS AROUND THE TAILS

Four risk dimensions, each sampled over the same ninety-day window.
Methodology notes sit inline so the page reads as a single object.

WHAT THE DESK IS SITTING WITH

A single sentence the research desk is holding in mind this week, and the small calendar of items sitting inside the next seven days.

A quiet week is not a boring one. It is a disciplined one.

— THE EDITORIAL VOICE —

WHAT TO WATCH · NEXT SEVEN DAYS

EARNINGS	AAPL · Tue after the close.
EARNINGS	005930.KS · Thu before the open.
MACRO	FOMC minutes · Wed 21:00 KST.
MACRO	US CPI · Fri 22:30 KST.
OBSERVATION	Top-2 semi correlation remains the week's structural read.
