

Goldman Sachs-style quant analysis for individual investors.

Multi-factor scoring model + AI-powered insights. Zero AI API cost for core analysis.

What It Does

- Analyzes stocks using Technical (RSI, MACD, Bollinger) + Fundamental (P/E, Revenue, Margins) + News Sentiment
- Generates BUY / HOLD / SELL signals with composite score (0-100)
- Kelly Criterion position sizing: calculates exact shares & dollar amount to invest
- AI chatbot explains analysis in plain language for beginner investors
- Supports US equities + Korean stocks (KRX) with dual currency (USD/KRW)

Scoring Model

Technical

50%

RSI, MACD, Bollinger
MA Cross, Volume

Fundamental

30%

P/E, Revenue Growth
Margins, Leverage, Beta

News Sentiment

20%

RSS keyword analysis
Bullish/Bearish scoring

Key Features

- Dashboard** Real-time portfolio P&L, Sharpe ratio, sector allocation, Kelly-sized positions
- Stock Scanner** Analyze any ticker instantly with full quant breakdown
- Discover** Auto-scan 70 stocks to find BUY opportunities, ranked by score
- Morning Brief** Wall Street news aggregation + GS-style analyst themes
- AI Chat** Claude-powered assistant that understands your portfolio context
- AI Coaching** Personalized portfolio advice: concentration risk, sector balance

Tech Stack

- Backend:** Python, Flask, SQLAlchemy, PostgreSQL
- Data:** Yahoo Finance API (real-time, free)
- AI:** Claude Haiku API (streaming chat, commentary, coaching)
- Analysis:** RSI, MACD, Bollinger Bands, Kelly Criterion, News Sentiment NLP
- Deploy:** Docker, Render.com, GitHub CI/CD

Cost Efficiency

- Core quant analysis: \$0 (100% algorithmic, no AI API calls)
- AI features (chat, coaching, commentary): ~\$0.60/month using Claude Haiku
- Total infrastructure: Free tier (Render + PostgreSQL + Yahoo Finance)
