SK Hynix	000660.KS	1	₩930,000	₩885,000	-4.8%	BUY	70/100
KT Corp	030200.KS	5	₩61,300	₩60,300	-1.6%	HOLD	59/100

Key Observations

High Risk Concentration

Portfolio is heavily weighted in speculative/small-cap positions (ABTC -86%, ETHU -79%, SMR -56%). These carry extreme downside risk.

BUY Signals Active

3 positions have active BUY signals: RXXR (80/100), NVDA (76/100), SK Hynix (70/100). Consider adding to these on dips.

Sector Imbalance

Technology sector accounts for ~78% of portfolio. Consider diversifying into Healthcare, Consumer, or Financials.

Korean Market Strength

Korean positions (Samsung, Hyundai, SK Hynix) show relatively smaller losses (-1.6% to -7.3%) vs US positions. KRX showing resilience.

Capital Utilization

100% invested with only \$406 + W565K cash remaining. Limited ability to average down or take new positions.

Recommended Actions

1. Consider trimming worst performers (ABTC, ETHU, SMR) to free up capital
2. Add to BUY-signal positions: RXXR (Score 80), NVDA (76), SK Hynix (70)
3. Diversify away from pure tech/speculative — add defensive positions
4. Set stop-losses on all positions to limit further downside
5. Monitor Samsung Electronics closely — near BUY threshold (67/100)

Scoring Model

Technical Analysis (50%): RSI, MACD, Bollinger Bands, Moving Averages, Volume

Fundamental Analysis (30%): P/E Ratio, Revenue Growth, Profit Margin, Debt/Equity, Beta

News Sentiment (20%): RSS feed keyword analysis (English + Korean), Bullish/Bearish scoring
